

From Building a House By Byron Barton

Make a Plan / Design the House

A machine digs a big hole.

Builders hammer and saw.

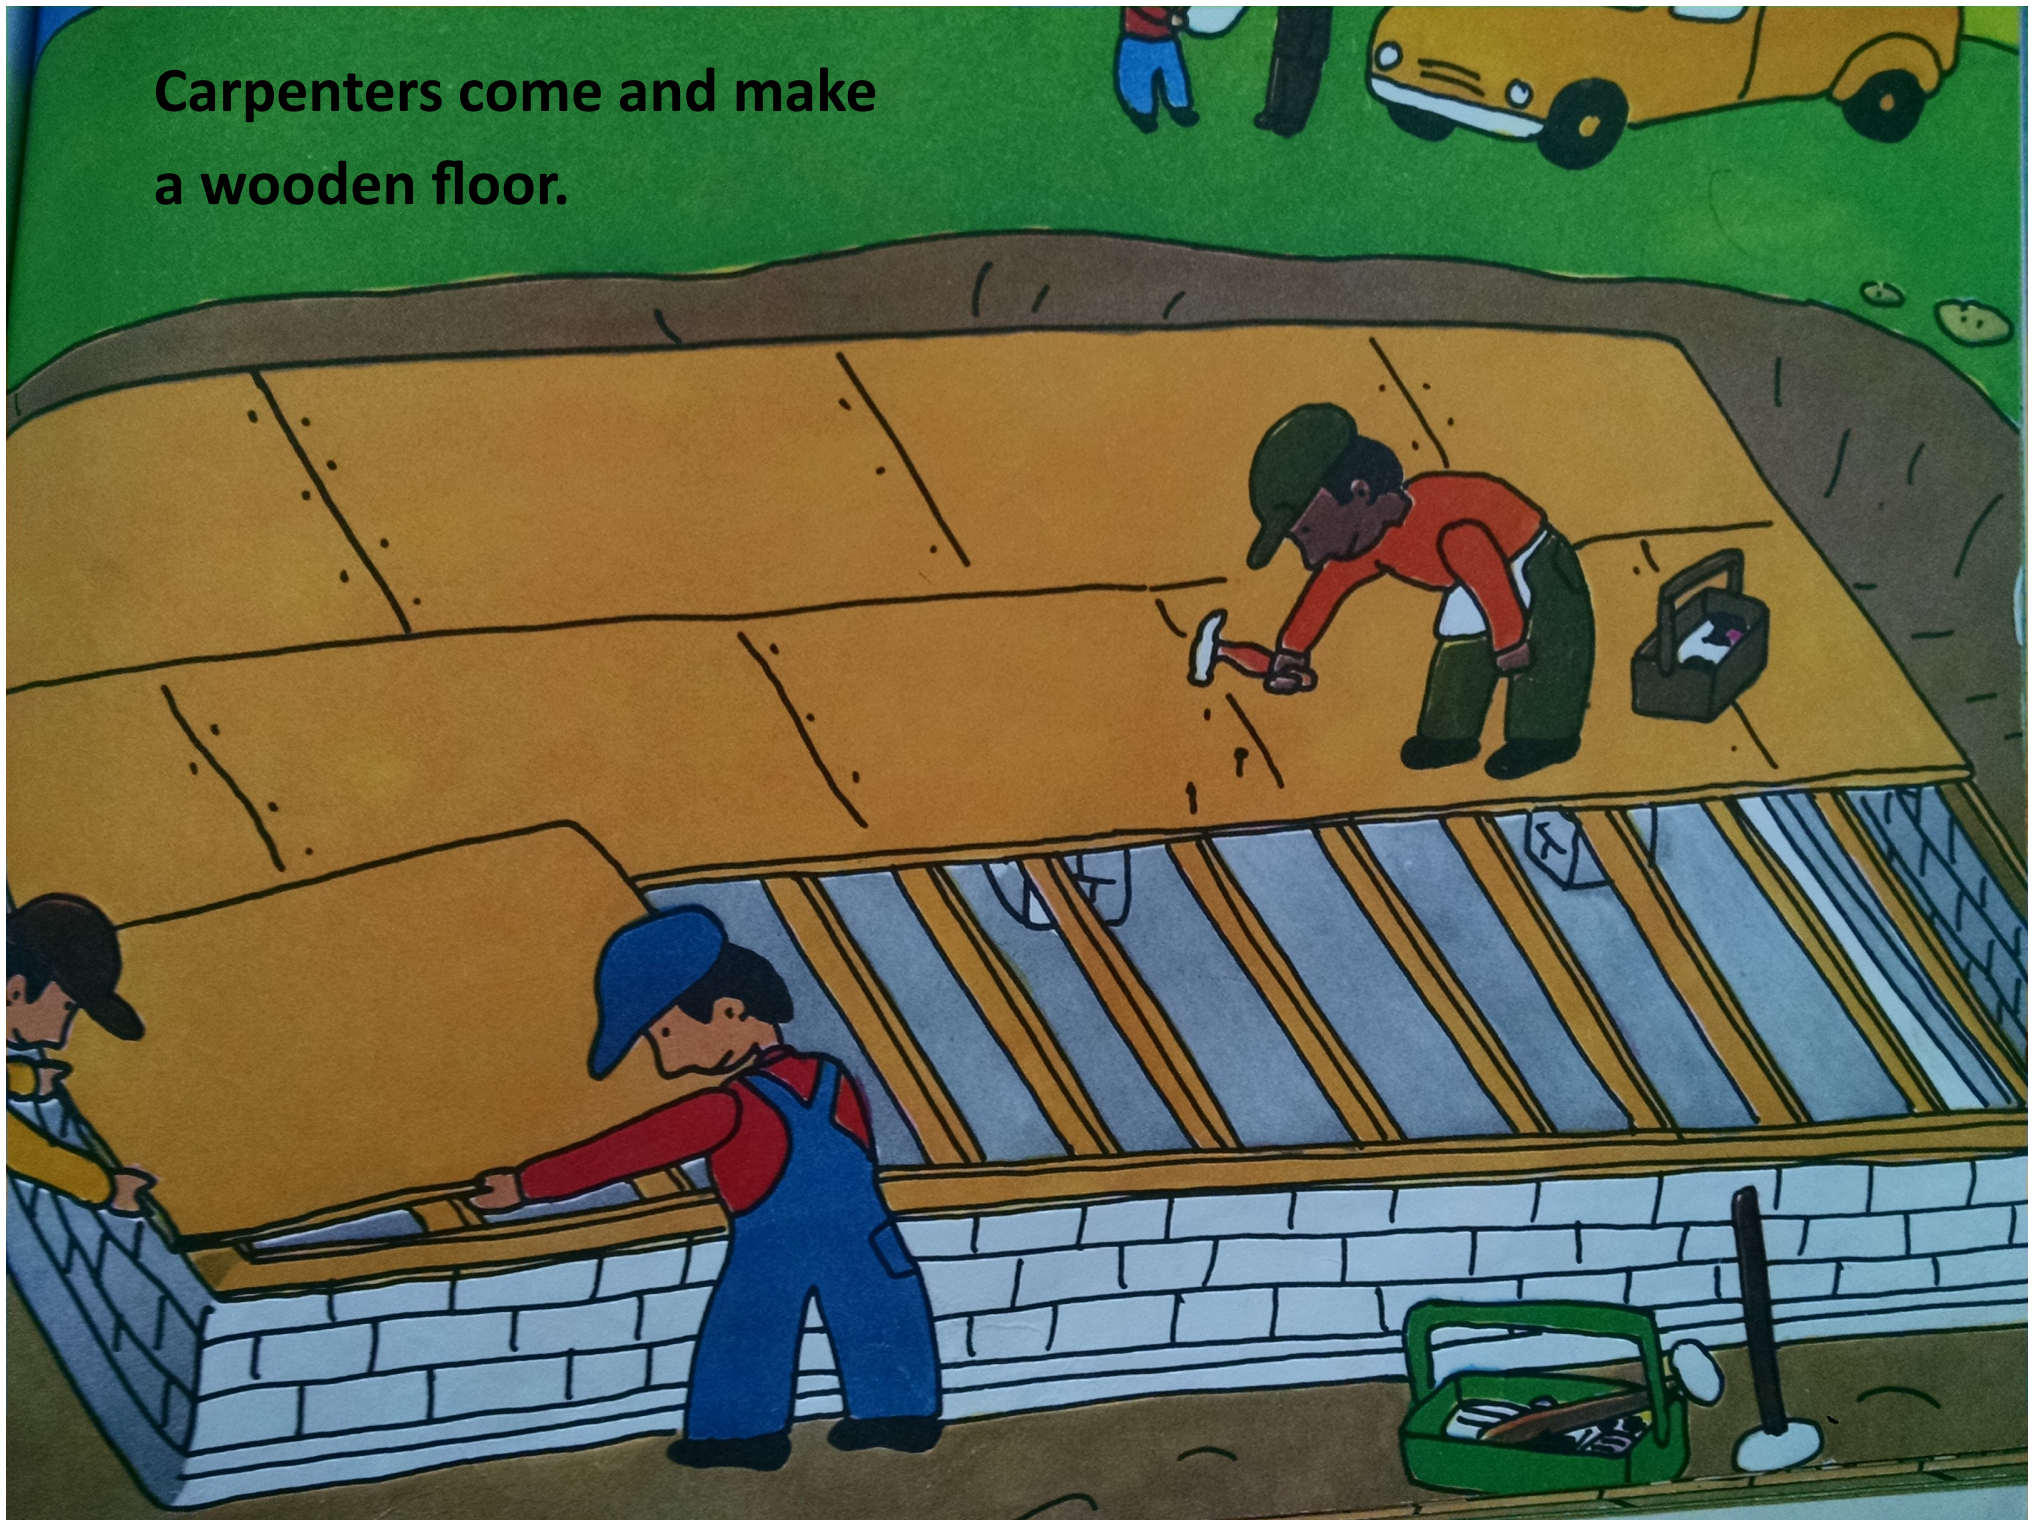

A cement mixer pours cement

Bricklayers lay large white blocks.

Carpenters come and make a wooden floor.

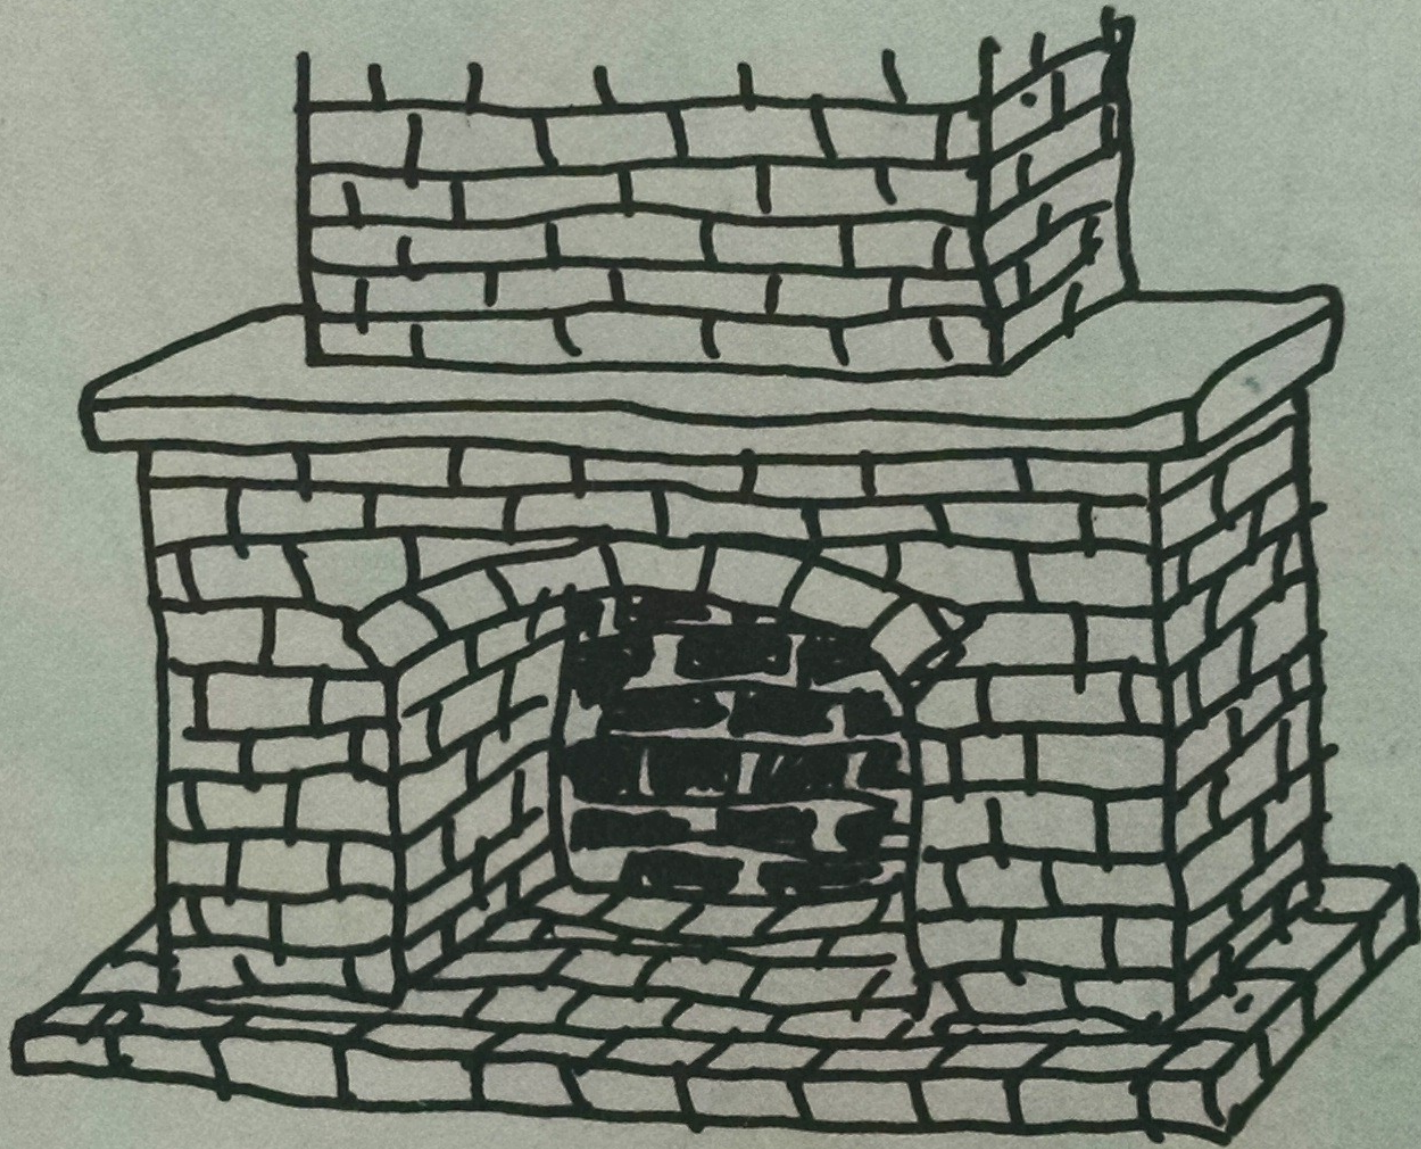

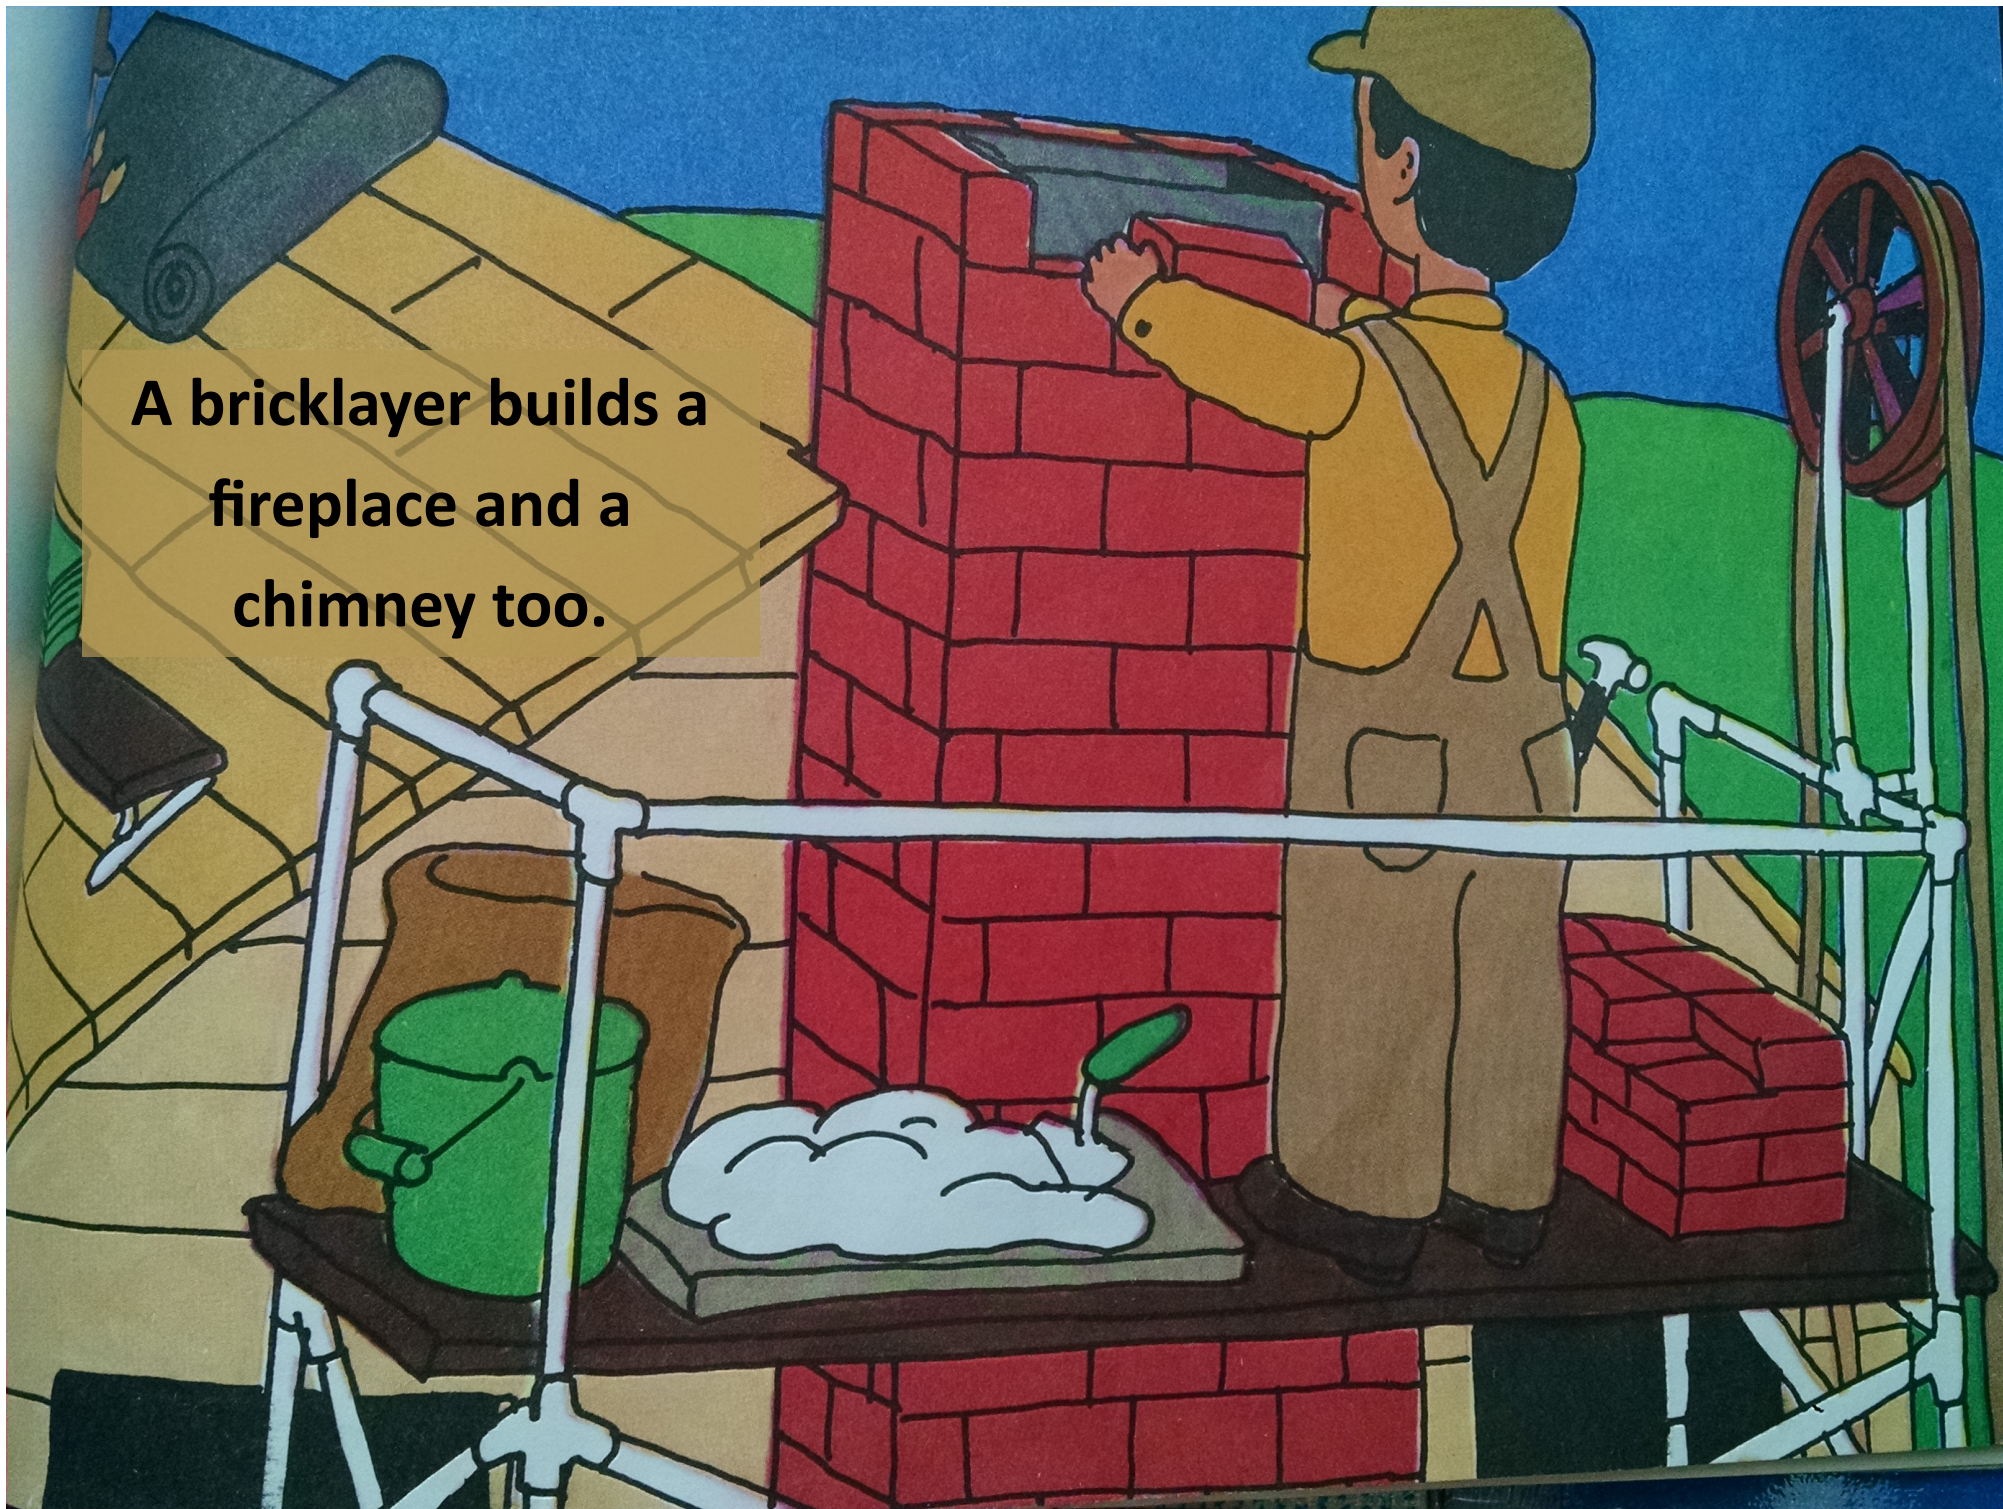

Carpenters put up walls.

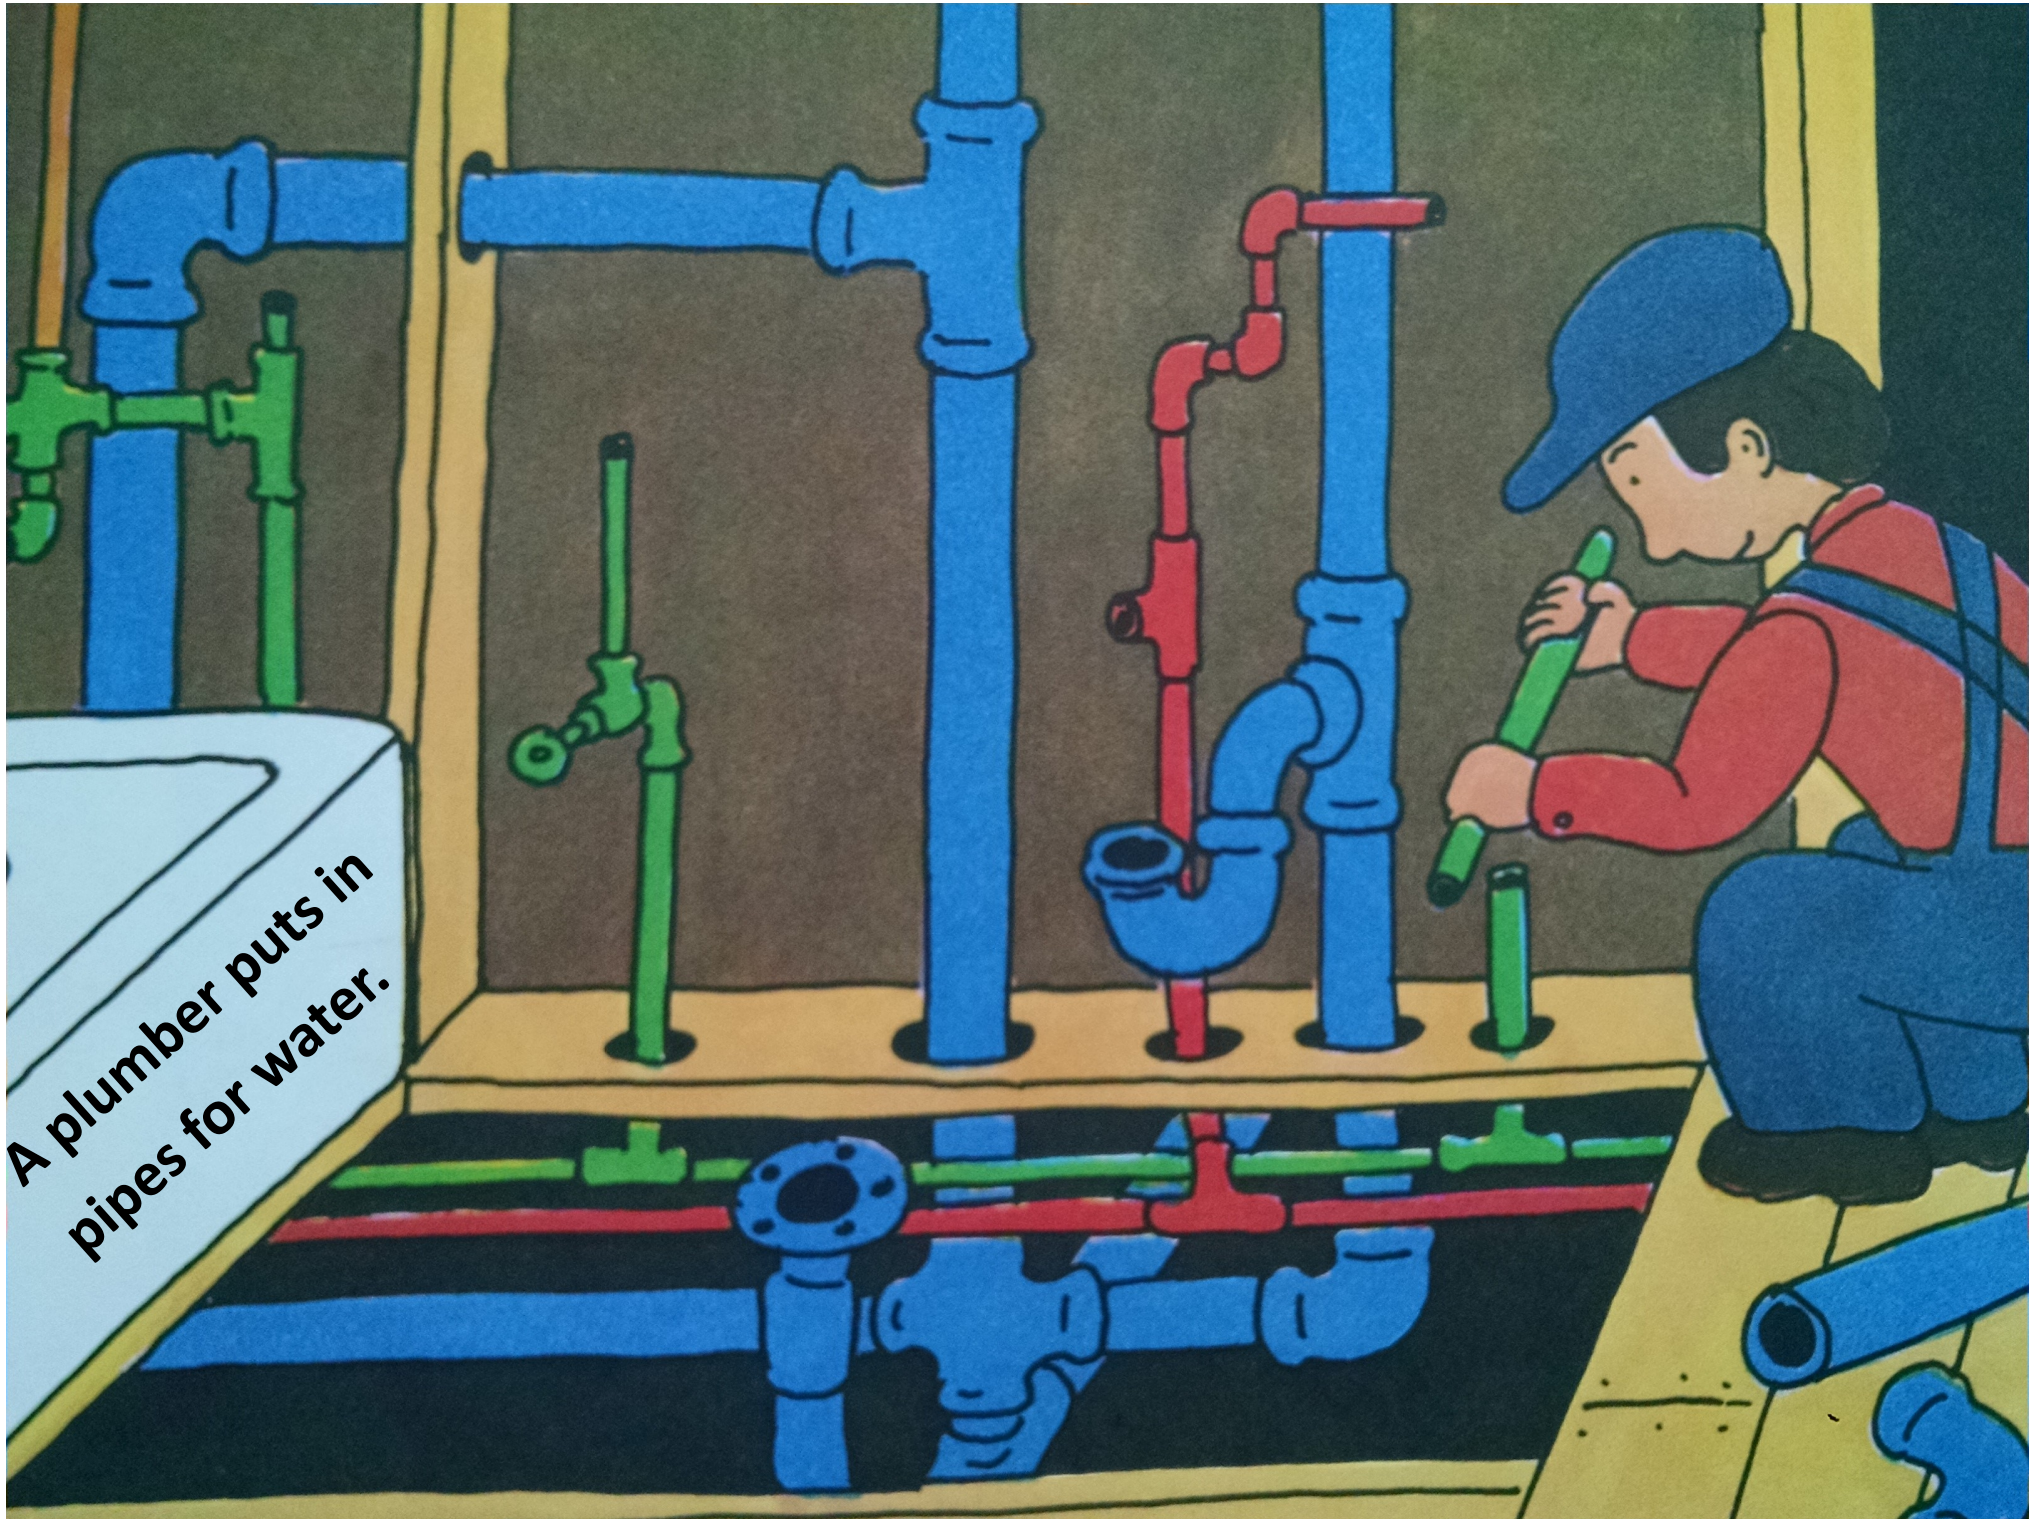

They build a roof.

**A bricklayer builds a
fireplace and a
chimney too.**

A plumber puts in pipes for water.

**An electrician
wires for
electric lights.**

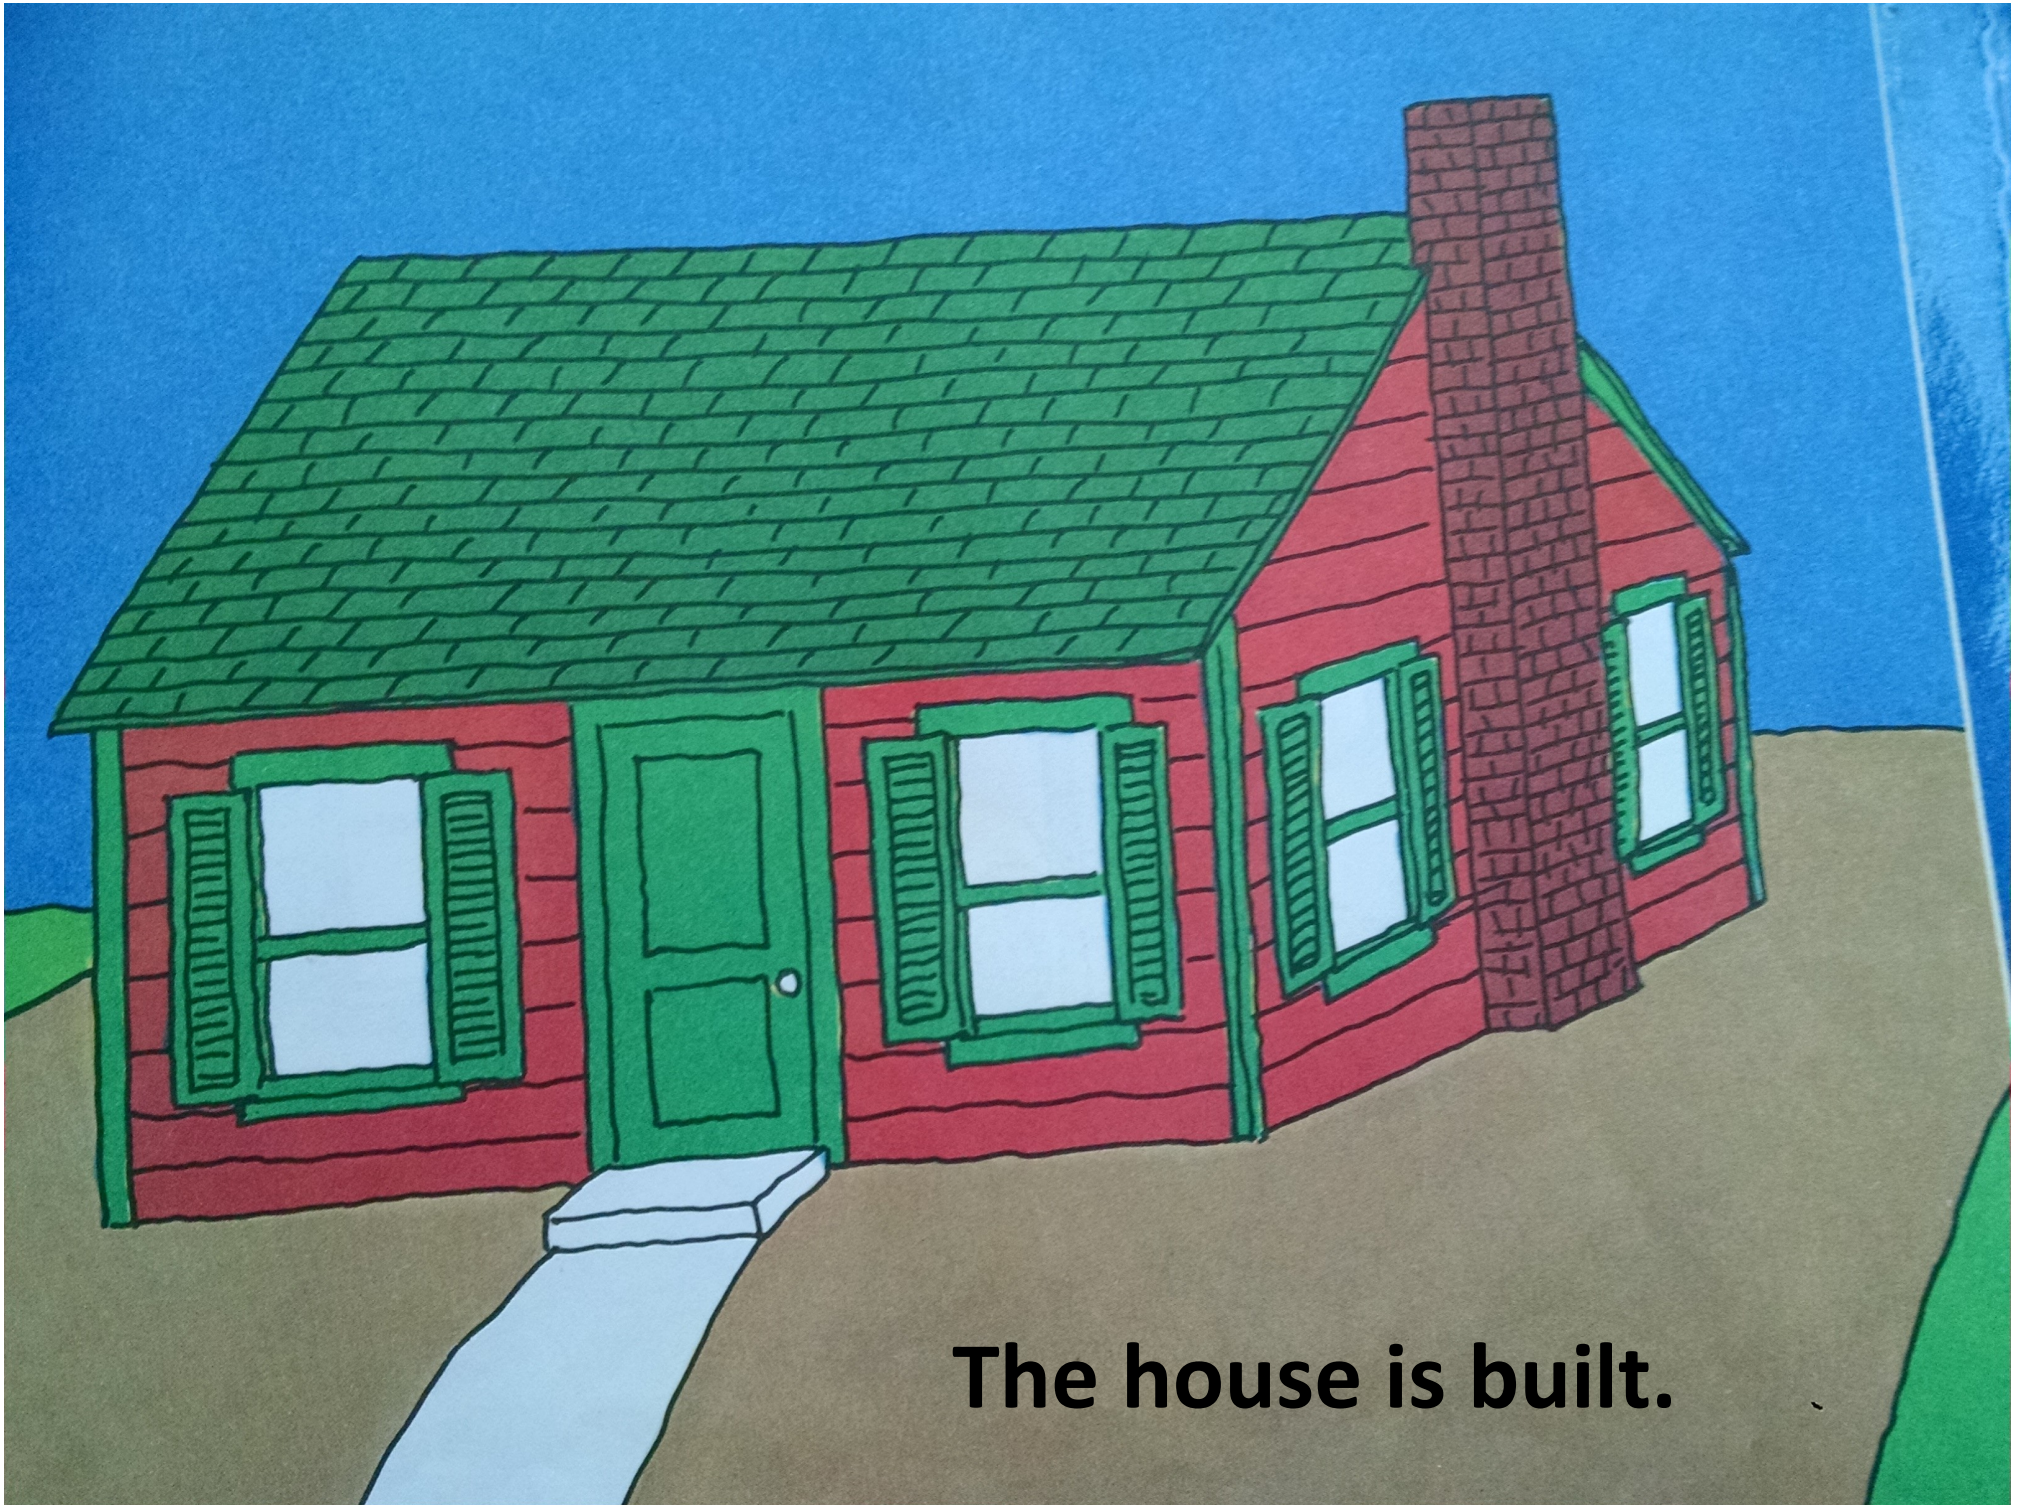

**Carpenters put in
windows & doors.**

**Painters paint
inside and out.**

The workers leave.

The house is built.

The family moves inside.

Our big crew moves everything into the house.

When Mom and Dad are busy, I show the crew where things go.
