

Make a Tree with Fluttering Leaves

1. Draw a tree trunk and branches.
2. Color them in.
3. Use the glue stick to glue on leaves, but only glue down part of the leaf!! It's important that half of the leaf is fluttering free, not glued down.
4. Get a balloon—charge it with static electricity by rubbing it in your hair. Wave it over the tree to make the leaves flutter.

Make a Butterfly

1. Decorate the butterfly body. Add eyes.
2. Glue the body to the wings.
3. Glue the body to the cardstock—do NOT glue the wings down!! Leave them loose.
4. Get a balloon—charge it with static electricity by rubbing it in your hair. Wave it over the wings to make the butterfly flutter.
