A T-Rex foot is about 36", but their footprints are 18" because they walk on their toes.

STEGOSAURUS

An adult stegosaurus footprint is about one foot long.

But not all dinosaurs are big! Some dinosaurs were the size of chickens, and others left footprints about the size of a cat's paw.

# How Big Were Dinosaurs?

A Tyrannosaurus Rex tooth could be up to inches long... this is 6 inches...
