

Make a Spinner

(Traditionally made from bamboo – in China they're called 竹蜻蜓 zhuqingting, or 竹蜻蛉 taketombo in Japan)

Decorate your spinner with markers. Then cut it out

Poke / punch a small hole in the center. Insert skewer.

Ask adult to glue it in place with hot glue gun.

Test it: hold the skewer between your palms and rub your hands together to make it twirl around. Then as it's spinning fast, lift your arms up and away from your body and let go.
