

How to Make a Snowflake

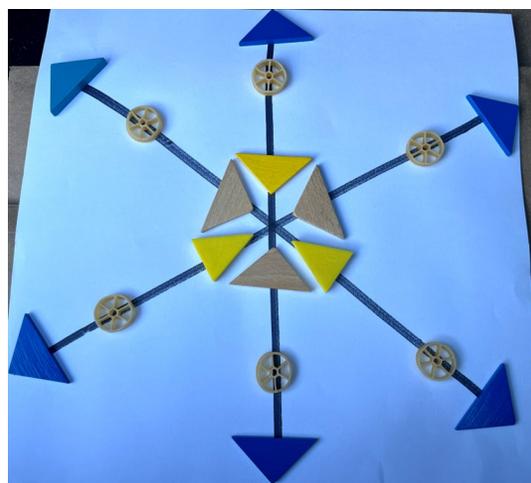

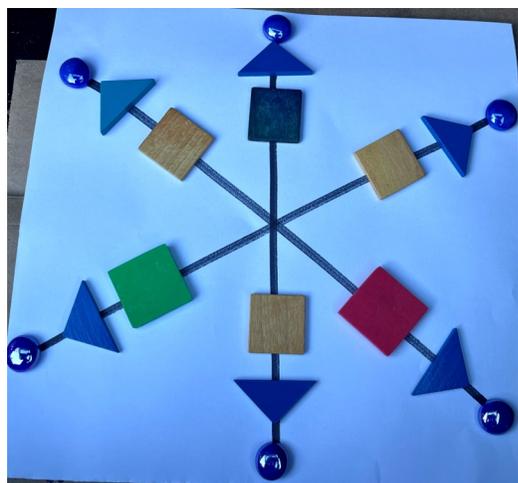

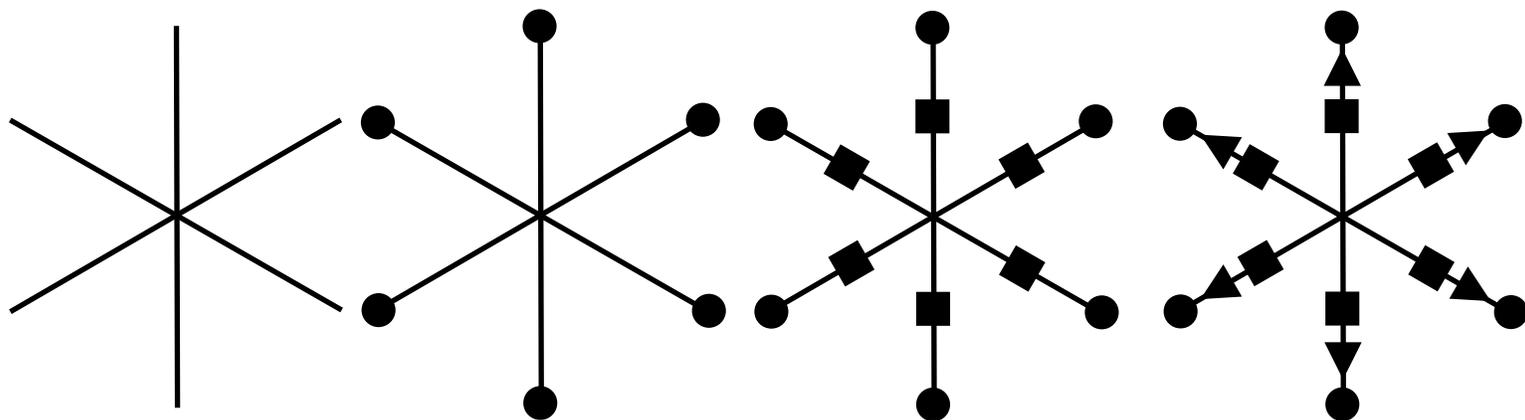

Snowflakes always have 6 arms, and each arm always matches.

So, try putting a circle at the end of each arm.

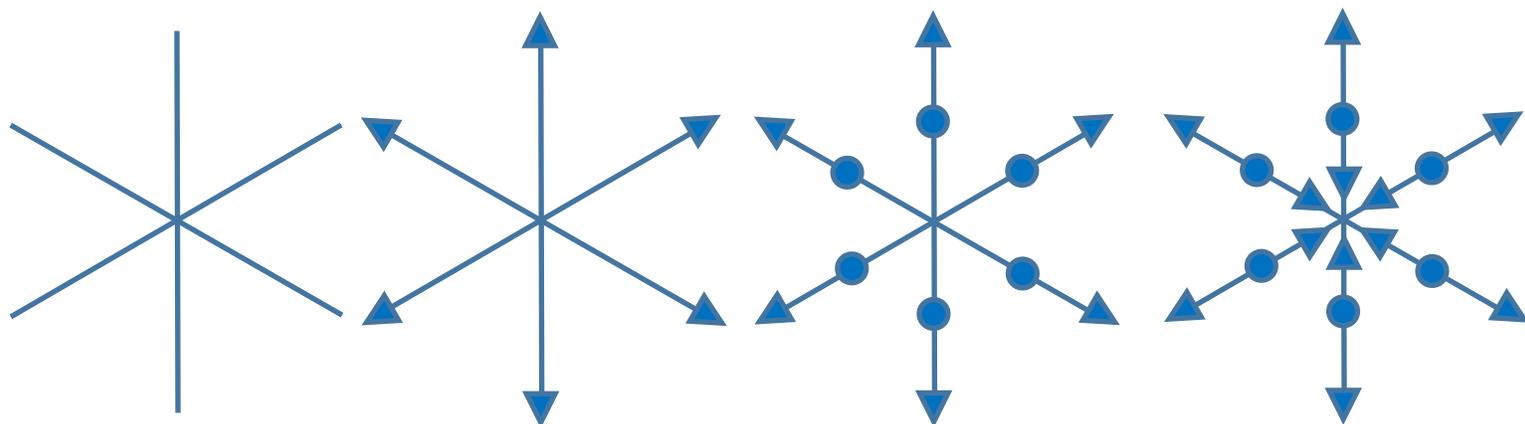

Then put a square on each arm, halfway between the center and the end.

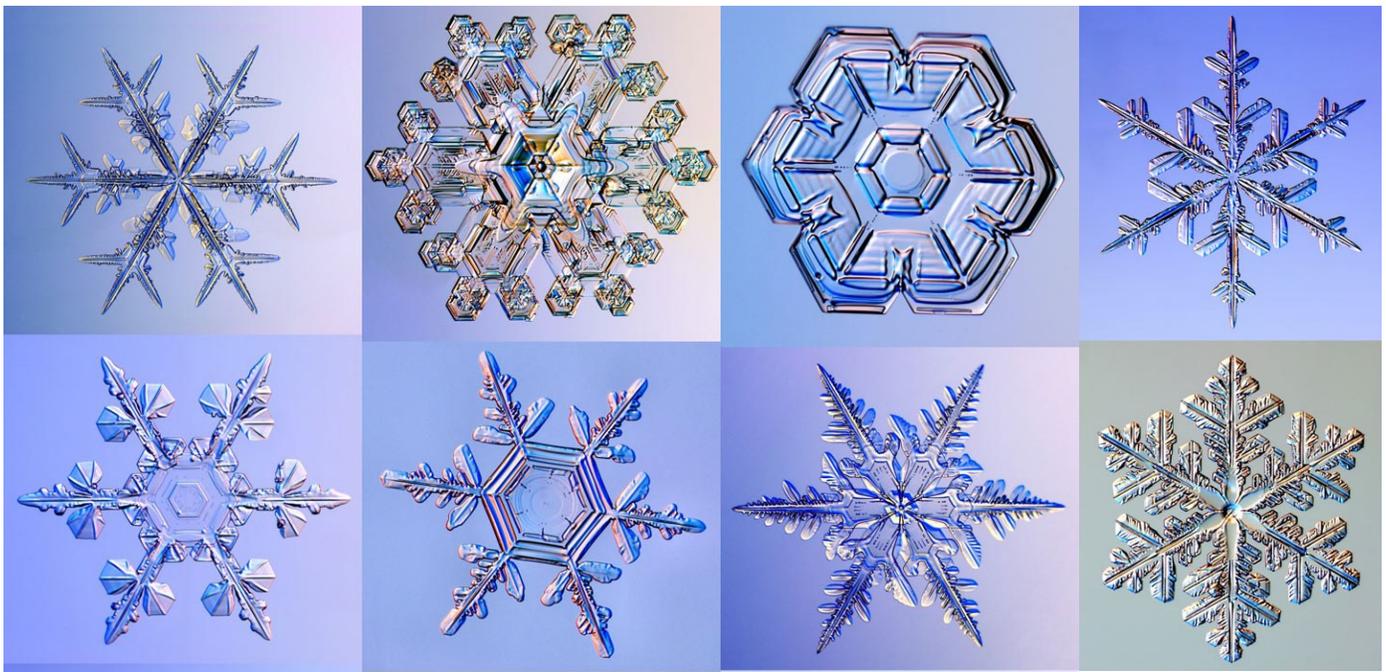

Then add a triangle halfway between each circle and square.

Do all 6 arms match?

Now try a different design.

How to Draw a Snowflake

Snowflakes always have 6 arms, and each arm always matches.

So, draw three lines, crossed in the middle. try putting a circle at the end of each arm.

Put a dot on each arm, halfway between the center and end. Draw lines connecting those.

Then add a triangle halfway between each circle and dot.

Do all 6 arms match? Now try a different design.
